

Technical Services

i-TEAM gives you new flexibility and confidence in handling a host of IT issues.

You can select individual services or have one of our consultants tailor a services solution that fits your exact requirements.

Our technical consultants combine the knowledge and skill of an engineer with the dedication of a technology partner to facilitate pre-sales technical support and proactive solution design.

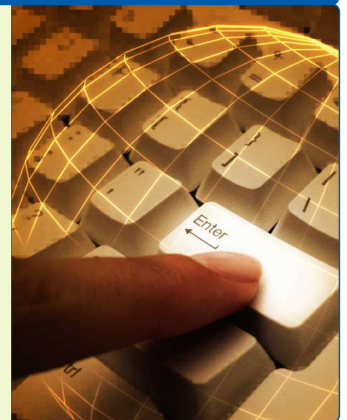

Installation Services

i-TEAMs installation services can handle everything from a simple installation to a complete, enterprise-wide networked solution.

Our installation teams are certified to handle the most complex network installations, including IP telephony and Security.

i-TEAM quality procedures help ensure the accuracy of your installation, through the entire process.

Network Design Services

i-TEAM offers design services for both local-area networks (LANs) and wide-area networks (WANs).

Whether your project is a new network, an upgrade or an expansion, our network consultants will create a plan that includes all design business requirements..

The goal is to design a network that is cost-effective, easy to manage, and has the flexibility to adapt as your company's business and technical requirements grow and change.

Maintenance Services

Establishing the correct level and type of maintenance service for your company's IT hardware and software can be a very challenging task.

i-TEAM can help you determine the appropriate level of service for each item in your IT infrastructure, sell you the appropriate coverage, and help manage your contracts to keep them up to date.

Customers require that their projects be delivered on time, within budget, and to certain specifications. i-TEAM will ensure success, delivering your solution in accordance with project management principles and best practices.
